HOW IT WORKS · SIMPLE BY DESIGN

Three steps. That's the whole job.

Open a job, add what it costs, bill it. The module keeps every figure in one place — no spreadsheets, no re-typing, no lost charges.

1

Create the job

Enter the job, party and shipment details once. Every expense and bill hangs off that job.

2

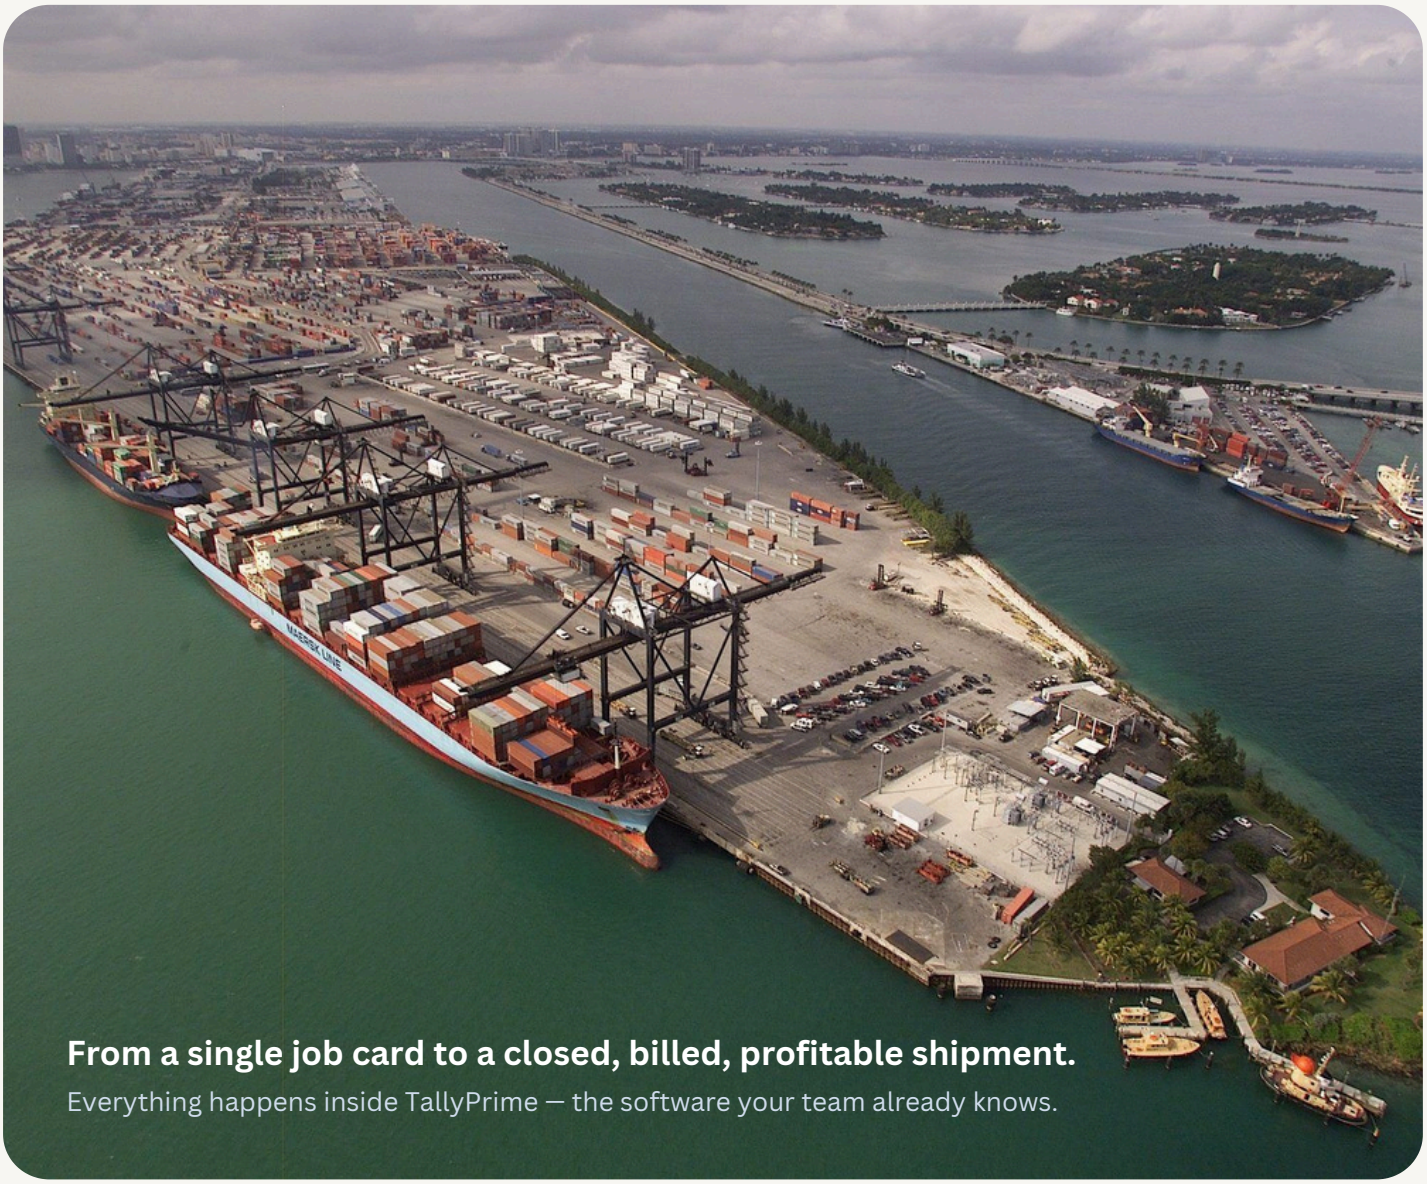

Add job expenses

Log transport, labour, port and misc costs as they happen — under the right heads.

3

Bill & close

Raise the invoice from the job. Reimbursables auto-fill. Close one job or many at once.

From a single job card to a closed, billed, profitable shipment.

Everything happens inside TallyPrime — the software your team already knows.

PLUG & PLAY

Plug into TallyPrime. Start the same day.

It's a TallyPrime add-on, not a new software. Install it, keep your existing data, and your team is billing on day one.
