TALLY CERTIFIED PARTNER
3 Star Sales & Implementation

PLUG AND PLAY RETAIL MODULE FOR TALLYPRIME

Garment and Footwear Business Module

Items create themselves, sizes add up on their own and stock updates by colour and size, inside your TallyPrime.

Auto item creation | Auto stock by size | Fast billing

THE EVERYDAY HEADACHE

One design. Many colours. Many sizes.

1 shirt style x **5** colours x **6** sizes = **30** separate items to create by hand

Usually, every one of those 30 items must be created before the first bill. With this module, they are created automatically while you enter the purchase or the sale.

WHAT YOU GET

Simple tools that save hours every week

Items create themselves
New style, colour or size? The item is created automatically while you enter the purchase or sale. No separate setup.

Stock that updates itself
Every sale and purchase updates stock by exact colour and size, so you always know which ones are left.

Billing that adds up for you
Fill the size columns and the quantity and amount are worked out for you. No long queue, even with many pieces.

Smart invoices
Invoices print with their own colour and size columns, so more items fit on a page and it reads clearly.

HOW IT WORKS

Three steps. No extra training.

1. **Enter the purchase** — Items are created for you.
2. **Bill at the counter** — Totals work themselves out.
3. **Check what is left** — Stock updates by itself.

AUTOMATION FOR RETAIL

Enter once. TallyPrime does the rest.

Garment stores | Footwear shops | Boutiques | Multi-brand showrooms | Franchise outlets

1 Items create themselves

A new sandal arrives in 3 colours and 5 sizes. Enter the purchase once and every item is created for you. No item master to set up first.

2 Sizes add up on their own

A family picks 6 pieces in different sizes. Fill the size columns and the quantity and amount are worked out row by row.

3 Stock updates itself

Sell a black size 8 and stock drops for exactly that pair. At month-end, your closing stock by colour and size is ready.
